

QUICK COVER

Using Given Calculations

Task 1 : Starting with **$147 + 85 = 232$** $\pm 10, 100$ and multiples of 10,100

Task 2 : Starting with **$54 \times 28 = 1512$** inverse operations, doubling, halving

Task 3 : Starting with **$36 \times 45 = 1620$** decimals $\times 10, 100, \div 10, 100$

Task 4 : Starting with **$104 \times 32 = 3328$** decimals, multiples of 10, multiple changes

Help and Hints.....

Using Given calculations

How has the question changed from the original question.....?

TASK 1

$$147 + 85 = 232$$

$$+200 \quad +10 \quad +200 \quad +10$$

$$347 + 95 = 442$$

TASK 2a

$$54 \times 28 = 1512$$

$$\times 2 \quad \times 2 \quad \times 2 \quad \times 2$$

$$108 \times 56 = 6048$$

TASK 2b

$$1512 \div 56 =$$

$$54 \times 28 = 1512$$

$$\times 2 \quad \times 2$$

$$? \times 56 = 1512$$

$$1512 \div 56 = 27$$

Rearrange to match the form of the given question

Missing operation is $\div 2$ $1512 \times 2 \div 2 = 1512$

$$54 \div 2 = 27$$

$$27 \times 56 = 1512$$

TASK 3

$$36 \times 45 = 1620$$

$$\div 10 \quad \times 100 \quad \div 10 \quad \times 100$$

$$3.6 \times 4500 = 16200$$

TASK 4

$$33.28 \div 64 =$$

$$104 \times 32 = 3328$$

$$\div 200 \quad \times 2 \quad \times 2 \quad \div 200$$

$$? \times 64 = 33.28$$

$$33.28 \div 64 = 0.52$$

$32 \times 2 = 64$ so $\times 2$ must be included on the RHS

$$3328 \times 2 \div 200 = 33.28$$

$$\text{So } 104 \div 200 = 0.52$$
